DG INTERNS HUB
Learn. Build. Grow.

Submitted by:	Vincent Kyalo Wambua
Internship Track:	Cyber Security Intern
Submission Date:	23 October
Week :	1
Task 1:	Lab Setup,Linux and Network Foundation
Student Id:	DG/15/OCT/CYBER/118

DG INTERNS HUB
Learn. Build. Grow.

Folder overview

This README describes the Week 1 internship learning materials and how they are organized. The week focused on cybersecurity fundamentals, Linux administration, networking foundations, virtual laboratory preparation, and guided cybersecurity practice.

The weekly report and presentation summarize the learning activities. Practical screenshots and supporting evidence are stored separately in the Findings folder.

Folder structure

```
WEEK 1/
├── README.docx
├── cheat sheet/
│   └── Linux command reference and notes
├── Findings/
│   └── Practical screenshots and supporting evidence
├── Notes/
│   └── Cybersecurity, Linux, networking, and ethical/legal notes
├── Reports/
│   └── Week 1 report and presentation
└── Writesup/
    └── Learning-platform writeups and challenge notes
```

Week 1 learning areas

- Cybersecurity fundamentals and the CIA triad.
- SOC analyst, penetration tester, and incident responder roles.
- OSI and TCP/IP networking models.
- IPv4/IPv6, MAC addresses, DNS, DHCP, TCP/UDP, and common ports.
- Linux filesystem navigation, users, groups, permissions, and command-line practice.
- Virtual machines, network isolation, connectivity testing, and snapshots.
- TryHackMe learning activities.

- OverTheWire Bandit command-line challenges.

Practical evidence

Screenshots and supporting evidence are maintained in the Findings folder. They are not duplicated in the weekly report or presentation. Record only activities that were actually completed, and ensure practical results, room completion status, and Bandit level transitions accurately reflect the work performed.

Security reminder: Do not include passwords, tokens, private keys, or other credentials in reports, screenshots, or writeups.

Main deliverables

Folder	Contents
Notes	Learning notes and theory
cheat sheet	Linux command reference
Findings	Screenshots and practical evidence
Writesup	TryHackMe and Bandit writeups
Reports	Weekly report and presentation

Professional and ethical practice

Cybersecurity exercises should be performed only in authorized learning environments and within the approved scope. Protect credentials, avoid exposing vulnerable systems unnecessarily, and document findings accurately.
